

Menominee County Deer Metrics Report

Spring of 2024

Management Unit:

Manager's Note:

The Menominee Reservation Deer Management Unit is located in the Northern Forest Zone. Most of the Menominee Reservation is under Menominee Tribal jurisdiction with deer hunting regulated by the Tribal government. There are some private land inholdings within the unit that would be under state regulations. Hunters are advised to familiarize themselves with property boundaries, as non-tribal access and hunting is not allowed on tribal lands. Non-tribal hunters who harvest deer on private, non-tribal properties within this unit should register their deer under the Menominee Unit designation. Tribal lands may block access to some of these properties. There is no season for firearm deer hunting by non-tribal members in this unit; the unit is archery-only for non-tribal members.

Deer Management Unit Harvest History

Fawn to doe ratios collected in late summer give information on fawn recruitment and survival and are used as an input into the formula for annual deer herd abundance estimation. Fawn to doe ratios were summarized using groups of county deer management units. County deer management units were grouped based on location, habitat characteristics, and deer demography.

Northern Forest Management Zone

Total Area of Unit (Sq. Miles): 364.80

Deer Range of Unit (Sq. Miles): 354.60
